SUMMARY

Frontend Developer with 4+ years of experience building scalable, high-performance web applications using React.js, JavaScript, and TypeScript. Skilled in performance optimization, API integration, and developing responsive, accessible (WCAG) user interfaces. Proven ability to deliver production-ready solutions, improve application efficiency, and collaborate effectively in Agile environments.

WORK EXPERIENCE

February 2022 - April 2026

Nuance Infotech | Indore, MP

Software Engineer (Frontend)

- Developed responsive and high-performance web applications using **React.js, JavaScript (ES6+), and TypeScript**, enhancing user experience and ensuring cross-browser compatibility
- Contributed across the full **Software Development Lifecycle (SDLC)**, including requirement analysis, frontend development, testing, and production deployment in Agile/Scrum environments
- Diagnosed and resolved complex UI issues, optimizing **API interactions, rendering performance, and state management**, resulting in smoother and more efficient user experiences
- Designed and implemented reusable, scalable UI components using **Redux Toolkit, Context API, and Redux Thunk**, following component-based architecture and clean code principles
- Optimized application performance using techniques such as **lazy loading, code splitting, and efficient data fetching strategies**, improving page load speed and overall responsiveness
- Improved **SEO and accessibility (WCAG compliance)** by implementing semantic HTML, structured layouts, and performance best practices
- Integrated and managed **RESTful APIs, WebSockets, and Firebase services**, ensuring efficient data flow and real-time updates
- Implemented secure authentication and authorization mechanisms using **JWT and OAuth**, enhancing application security and session management
- Collaborated closely with **UI/UX designers, backend engineers, and product managers** to deliver intuitive, user-centric, and mobile-first interfaces
- Managed version control and CI/CD workflows using **Git, GitHub, Bitbucket, and Vercel**, enabling reliable and faster deployments
- Followed software engineering best practices, including **code reviews, refactoring, debugging, and design patterns**, ensuring scalable, maintainable, and production-ready applications

TECHNICAL SKILLS

Programming Languages & Scripting:
JavaScript (ES6+), TypeScript, JSX

Frameworks and Libraries:
React.js, AngularJS, JQuery, Ionic (React), Next.js

State Management & Architecture:
Redux Toolkit, Context API, Redux Thunk, Component-Based Architecture, Routing & Navigation, React Router

Web Technologies: HTML5, CSS3, Responsive Design, Accessibility (WCAG), SEO Optimization

APIs & Integration: RESTful APIs, WebSockets, Perplexity AI API, Axios, WebRTC, JWT, Firebase, OAuth Authentication

Version Control & CI/CD: Git, GitHub, Bitbucket, Vercel

Tools: VS Code, Jira, Trello

AI Development Tools: Cursor, GitHub Copilot, ChatGPT

Testing: Jest

SOFT SKILLS

Analytical Thinking
Communication
Problem-Solving
Decision-Making
Leadership Skills

EDUCATION

Bachelor of Science, Computer Science
Devi Ahilya University, Indore, India

LANGUAGES

English, Hindi

PROJECTS

SYSN Auto Logistics Web Application

Tech Stack: ReactJS, Redux Thunk, Stripe, OpenAI API, APIs, Git

- Developed a scalable logistics management platform supporting vehicle transportation operations across multiple cities in the US, streamlining end-to-end transportation workflows
 - Implemented **AI-powered dynamic pricing and quote generation** using OpenAI API, improving automation and pricing accuracy
 - Built secure authentication and **role-based access control (RBAC)** for multi-tenant user management
 - Designed responsive and high-performance UI using **React.js and Redux Thunk**, ensuring smooth navigation and efficient state management
-

NVOX Web Application

Tech Stack: React.js, Redux, Stripe, WebRTC, APIs, Git

- Built an interactive and accessible ADHD assessment platform for children using **React.js**, focusing on responsive and user-friendly UI
 - Developed **AI-driven multi-step test workflows** with avatar-based interactions to improve engagement and test accuracy
 - Integrated a secure **payment gateway (Stripe)** and implemented real-time monitoring using **WebRTC (camera, microphone, screen recording)**
 - Optimized state management using **Redux and Context API**, ensuring a smooth user experience and seamless navigation
 - Ensured **accessibility (WCAG compliance)** and cross-device compatibility for a wide range of users
-

GLOCAL Web Application

Tech Stack: React.js, Firebase, Geolocation API, Vercel

- Developed a real-time chat and social networking platform using **React.js**, focusing on performance and responsive UI
 - Implemented **real-time messaging** using Firebase and integrated the **Geolocation API** for proximity-based user discovery
 - Built core features, including **user registration, profile management, timeline, and media gallery**, enhancing user engagement
 - Deployed application using **Vercel**, ensuring fast load times and optimized frontend performance
-

GOTO Chef Mobile Application

Tech Stack: React.js, Ionic, REST APIs, Stripe, Context API, Git, Jira

- Developed a cross-platform e-commerce application using **React.js and Ionic**, delivering a mobile-first and responsive user experience
 - Implemented key features, including **product listing, advanced search with filters, cart, and checkout workflows**
 - Integrated **Stripe payment gateway** and backend APIs for CRM and shipping, enabling real-time order tracking and management
 - Built dynamic and reusable UI components with **React Context API**, ensuring scalable and maintainable architecture
 - Optimized API handling and UI performance for smooth user interactions across devices
-
